

SWIFT LOW FOAM

- Heavy duty floor cleaner/degreaser
- Low foaming—ideal for use in scrubber/dryer machines

Product Information

DESCRIPTION:

Swift Low Foam is an alkaline multi-purpose hard surface cleaner and degreaser containing water soluble solvent. It is effective in hard or soft water, hot or cold solution. It is fully bio-degradable. The 'low foaming' properties of Swift Low Foam make the product ideal for use through automatic scrubber/drying machines but it can also be used with a conventional mopping system and rotary floor scrubbing machines fitted with green or blue floor maintenance pads.

Swift Low Foam should be used for preparing sealed/coated Granwood/Gransprung and wooden floors prior to re-coating (please refer to our procedure data sheets for full information.)

Swift Low Foam is particularly recommended as a periodic cleaner for sealed/coated Granwood/Gransprung and wooden floors in sports halls, gymnasiums and general activity areas which are subject to constant outdoor shoe traffic.

Black heel marks can be removed with neat Swift Low Foam applied with a trigger sprayer. This operation should be carried out a few minutes before the scrubbing procedure.

INSTRUCTIONS:

Swift Low Foam may be diluted with up to 30 parts water according to the amount of dirt or grease contamination and type of surface to be cleaned. Swift Low Foam should be applied by mop or through a scrubber/drier following the machine usage instructions. Allow to penetrate and emulsify dirt and grease before machine scrubbing or mopping clean. Remove all resultant residues, rinse with clear water and allow surface to dry. When floors are cleaned with Swift Low Foam prior to re-finishing, or if a strong solution has been used, it is recommended that Granwax Neutrasol is applied to the floor (at same dilution rate) after the cleaning procedure and prior to rinsing with clean water. This will ensure that all traces of alkaline residue is removed.

RECOMMENDED DILUTIONS:

Light floor cleaning	1 part Swift Low Foam to 30 parts water
Medium floor cleaning or floors considered to be slippery:	1 part Swift Low Foam to 20 parts water
Heavy floor cleaning , excessively dirty, greasy or slippery floors:	1 part Swift Low Foam to 4 parts water (and neutralise with 'Neutrasol')

STORAGE:

Store in a cool, dry place. Protect from frost. Keep out of the reach of children.

HEALTH AND SAFETY:

For full health and safety information, please refer to the product Material Safety Data Sheet.

The information provided herein is correct to the best of our knowledge. No liability for any errors or omissions is accepted. You should satisfy yourself by appropriate trials that the product is suitable for the intended use. Granwax Products Ltd can accept no responsibility for any loss as a result of any person placing reliance on any material contained herein.
